Andres Sevilla

Software Engineer

andressevilla81@gmail.com · Portfolio link · https://www.linkedin.com/in/andres-sevilla-59273a289/

SUMMARY

Software engineer with a focus on the intersection of applied mathematics, interactive simulations and real-time graphics, proven track record on shipped games for Apple Arcade, scientific computing and interactive VR scenes for architectural firms. Keen on problem solving, navigating complex environments or codebases, handling pressure and tight deadlines without sacrificing quality.

WORK EXPERIENCE

Game Developer

Tag Wizz | Dec 2024 – Sept 2026

Outsourcing studio contracted by other studios to build and ship their games.

- Lead programmer on mobile game Pocket City's Apple Arcade launch, collaborating with a backend programmer, graphic designers, 3D modeler, quality assurance team, delivered real-time iCloud synchronization, cross-platform functionality, adaptation of the game across multiple platforms and finding and fixing bugs to achieve high grade polished version of the codebase. Navigated through Apple's certification review to launch, iterating with Apple's quality assurance team until every requirement passed.
- Delivered a content update for mobile game Farmside (Apple Arcade) traced a large, unfamiliar codebase to scope and land targeted changes, and coordinated with the team on the build and compilation pipeline to hit hard deadlines.
- Built UI systems for an unannounced in-house Xbox title and gameplay mechanics for in-house project.

VR architectural visualizations

Freelance | Jan 2026 – Current

- Currently working with an architectural firm taking their raw 3d scenes and making them into interactable VR scenes for clients to explore. In this environment extremely high fidelity and accurate lighting are necessary to resemble real real-life results and achieve photorealism.

Promotional animations

Freelance | July 2026 – Current

- Businesses in Mexico City hire me to create immersive worlds and animations to promote them.

SKILLS

- Programming languages: C#, C++, Python, GLSL, Java
- Frameworks & platforms: Unity, OpenGL, TouchDesigner.
- Spoken languages: Spanish — Native; English — Fluent

EDUCATION

B.Sc. Applied Mathematics

*Instituto Tecnológico Autónomo de México (**ITAM**) | Jan 2022 – Dec 2026*

Project lead and lead programmer on TERA tech, a branch of a student educational organization where we dedicated ourselves for over a year to creating educational video games for children. We created games about space, planet orbits, marine life, musical instruments and others.
